

PERFORATED DIFFUSER + FILTER

Model PD+Filter

The Polyaire Perforated Diffuser + Filter is the one product which offers complete and simple service ability for all situations.

A unique design which is very similar to the Polayire EC-HF Return Air Egg Crate Grille + Filter and can easily be installed and offer the latest in disposable filter pad technology. Ideally suited to environments where regular maintenance of the filter media is a concern, the Perforated Diffuser + Filter is designed for quick, simple filter pad change.

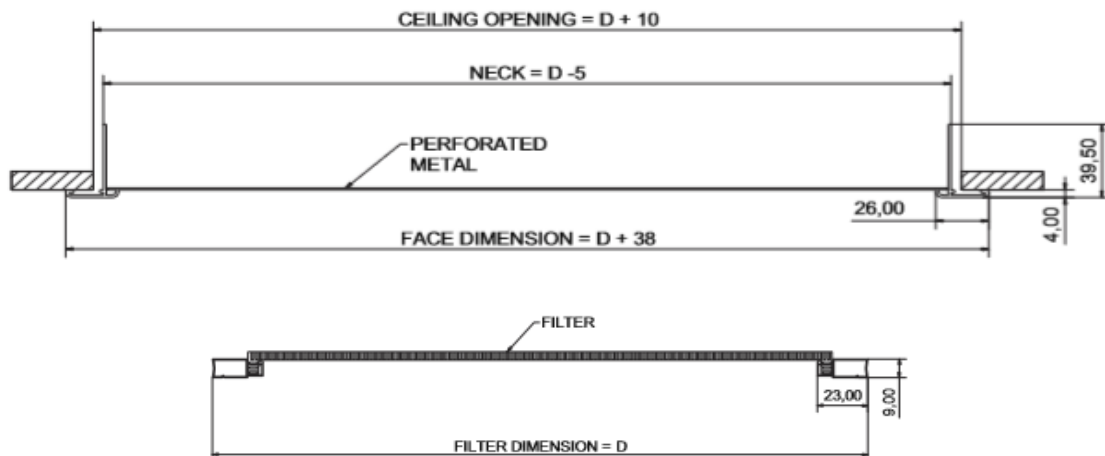

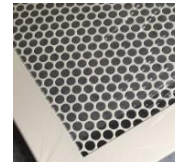

The actual filter pad is a product of exhaustive research by one of the worlds largest air filtration authorities with approval from the American Under-writers Laboratories. A distint black coloured filter media shows dirt and particle build up and provides for ready inspection prior to replacement as required.

Spare Filters are available on request.

Standard colour is powder coat white - RAL 9010

Other finishes are available to suit the interior requirements.

Item #	Size	Neck
248102	595x595 (Lay-in)	550x550
